OCEANVIEW NIGHT VISION CAMERAS WITH HD THERMAL IMAGING

OceanView Technologies has introduced HD thermal imaging as an option on its entire line of night vision cameras, including the Poseidon, Zeus, Atlas and Triton models.

The Apollo II HD thermal imaging system delivers images in 640 x 480 high definition — providing sharper detail and greater visual range.

OceanView's night vision camera systems are available in a variety of configurations to suit most needs, including dual and three-camera systems, high zoom cameras and precise fibre-optic stabilisation.

The night vision cameras have a quick-release base for easy assembly, maintenance and storage.

FINSCAN'S BIOMETRIC ENGINE STARTER

The Bio eStart Solo for single diesel and gasoline engine boats has been introduced by FinScan, bringing a fingerprint engine-starting solution to boats under 8.5m (28ft).

To start the boat with Bio eStart Solo, a programmed finger is presented to the fingerprint sensor for matching. Pressing the green 'Start' button will then start the engine.

The Bio eStart Solo also features Elevated Safety Mode (ESM), which will disable engine starting if dangerous conditions occur.

DOMETIC NETWORK INTERFACE

The Cruisair DX Gateway Network Interface for direct expansion (DX) marine air conditioning systems has been designed by Dometic to provide networked air conditioning monitoring and control from a single onboard location.

Compatible with Cruisair Q-Logic cabin controls, the Gateway provides two-way data transmission via Modbus/TCP Ethernet protocol. The system also offers real-time information such as temperatures and fan speed.

NORTHERN LIGHTS REDESIGNS M673-SERIES

Northern Lights has redesigned its M673-series of 5kW-6kW marine diesel generators. The M673LD3 and M673L3 are diesel dynamos suited for both boatbuilders and refit customers. The new design is said to reduce volume by 20 per cent compared to existing models when equipped with sound enclosures.
